Style: Webbing Edge ☐ Wire Edge - D Ring ☐ Wire Edge - Plate Corners ☐ Other

Wire Size: (if blank we will use default size) | Wire Exit: | Wire Supplied: (If blank, wire will be supplied)

Label:

Notes:

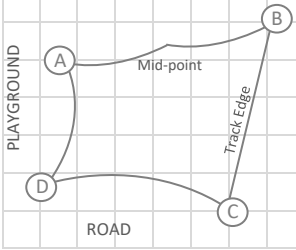

Site diagram: Sail #:

No dimensions required on this plan

Make notes so the installers know which way around the sail goes

Label corners A,B,C etc in clockwise direction, beginning at top left

See example below for 4 Point Sail

Hardware: (include tensioning hardware and shackles. Do not include eyebolts or eye plates, order these separately)

		Length	Supplied
A			
B			
C			
D			
E			
F			
Mid-point (if any)			

Leave blank For OFFICE use

Tick if you want hardware supplied with the sail

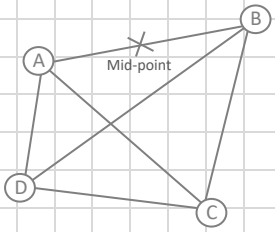

SHADETEX SAILS
SUPERIOR SUN SHADE

Dimensions diagram:

Draw diagram with edge lines and diagonal lines between all points

Label corners A,B,C etc in clockwise direction, beginning at top left (match diagram on previous page)

See example below for 4 Point Sail

Edge Measurements:

	Measurements (mm)	Track	Midpoint	Curve %
A-B				
B-C				
C-D				
D-E				
E-F				
F-A				
	Enter the all edge measurements (around sides of the sail)	Tick if the sail has a fixed track edge	Tick if you require a midpoint or kissing point	If this is blank we will do standard curves

Internal track dimension (mm)

Enter the internal dimension of your aluminium track

Diagonal Measurements:

	Measurements (mm)
A-C	
A-D	
A-E	
B-D	
B-E	
C-E	
B-F	
C-F	
D-F	

Enter the all diagonal measurements (across the sail)

Fixing heights and details:

	Heights (mm)	Eyes in place	Horizontal	Post	Building
A					
B					
C					
D					
E					
F					
	Enter the height of each fixing point from a level or datum line	If this is blank we assume fixings are not installed	If this is blank we assume fixings are vertical	For perfect stretch compensation we need to know if the sail is attaching to poles or a building	

It is great to attach photos of your site and/or architectural plans
